1. Claims 1-7 and new claim 20 are currently alive in view of the 8-14-03 amendment in the current application.
  2. In claim 1 line 4, "he" should be "the" due to an obvious oversight.
  3. Claims 1-7 are again rejected and 102 and 103 for the same reasons given in the last office action in paragraphs 5-7.
  4. New claim 20 which depends from claim 1 is rejected under 102/103 for the same reasons as parent claim 1 as stated above.
  5. Concerning applicant's remarks, Kerner is said to lack pins compatible for wire bond connection to the hybrid circuit. Kerner's pins 61 are connected to a flex circuit. However, the claim language does not require actual wire bond connection. Only compatibility or capability of such is in the current language. Such a limitation is functional and quite broad. Such is not ignored but is met by the top of pins 61 as shown in figure 5. Such exposed pin tops are capable of being wire bonded-----the claim language requires no more. As such, the language is broader than argued and believed to be properly rejected as stated above.
- It is also argued that applicant's bottom has heat sink capabilities. The bottom 2 of the reference could be of metal and such has sink capabilities. Even molded plastic has "heat sink capabilities".
- Tugcu's partitions are also argued in precisely what is separated. Partitioning for separation is notoriously known. Such would have been obvious over the applied art to separate whatever is desired. The precise elements being separated are not critical and such was not demonstrated by applicant.

New claim 20 is also broader than argued. The hybrid circuit is perpendicular to the bottom. No planar axes are established by applicant's claim language. There are a multitude of horizontal and vertical planes that could go through both elements.

All arguments have been answered and the claims are properly rejected under 102 and 103.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
